Dr. Americo Groszmann  
Servico Nacional de Pesquisas Agronomicas  
Caixa Postal 1620, Rio de Janeiro

Dear Dr. Groszmann:

~~There~~ There have been few studies bearing on the genetics of nitrogen fixing bacteria. However, you might find it profitable to consult the following workers, who have made some studies in that direction:

Prof. A. Eisenstark, Dept. Bacteriology, Kansas State College, Manhattan, Kans.

Prof. M. R. Zelle, Lab. Bacteriology, Cornell University, Ithaca, N.Y.

Prpf. O. Wyss, Dept. Bacteriology, Univ. of Texas, Austin, Texas.

I wish you all success in your experiments, and hope you will inform me of them through your publications. Under separate cover, I am sending some reprints that may be helpful to you. The enclosed bibliography may also be useful.

Yours sincerely,

Joshua Lederberg  
Professor of Genetics
